

WT.1_filter0

Sequence logo for WT.1_filter0. The sequence is ATGAGTCAATAATCA. The y-axis represents information content, with positions 1-10 having high values (up to 1.5 bits) and positions 11-13 having low values (below 0.5 bits). The x-axis represents the sequence positions.

WT.1_filter110

Sequence logo for WT.1_filter110. The sequence is ATGAGTCAT. The y-axis represents information content, with positions 1-6 having high values (up to 1.5 bits) and positions 7-10 having low values (below 0.5 bits). The x-axis represents the sequence positions.

WT.1_filter59

Sequence logo for WT.1_filter59. The sequence is TGAAGTCATATCAGAA. The y-axis represents information content, with positions 2-7 having high values (up to 1.5 bits) and positions 8-12 having low values (below 0.5 bits). The x-axis represents the sequence positions.

WT.1_filter12

Sequence logo for WT.1_filter12. The sequence is GCTGAAGTCATATCAGAACT. The y-axis represents information content, with positions 2-7 having high values (up to 1.5 bits) and positions 8-12 having low values (below 0.5 bits). The x-axis represents the sequence positions.
